Education

Western University Student
Computer Science; Ivey Advanced Entry Opportunity (AEO)

Experience

Anticipation Labs Aug. 2026 to present
COO (current); previously Founding Software Engineer

- Lead customer discovery, product testing and recruiting for Elda, a screenless bracelet in development for older adults.
- Visited care homes and spoke with older adults and caregivers to guide product decisions.
- For Anticipy, directed AI-assisted connected-app repairs and private AI workflows; tested phone and wearable prototypes.
- Scoped and tested a consent-page redirect repair for Anticipy, restoring the browser journey to provider sign-in.

Stellar Learning Aug. 2025 to Jul. 2026
Chief Technology Officer

- Led technology work at a free exam-prep platform with 40,000+ learners, 80+ courses and 130+ volunteers.
- Changed IB question generation after AP prompts produced off-syllabus questions; shipped IB practice features with the team.
- Improved the AP question and lesson generation pipelines.

DocuBridge Jul. 2025 to Aug. 2025
Software Engineering Intern

- Built a Python/Flask and React prototype for Excel and CSV exploration, with charts, summaries and natural-language questions.
- Connected worksheet selection to Pandas analysis and Plotly charts.

Research

Youreka Canada 2025
Co-author and student researcher

- Co-authored a 34-country study of adolescent fertility and pediatric HIV treatment coverage, leading writing and analysis and creating graphs in R.
- Published as the national first-place team study in the 2025 Youreka Canada Journal.

Projects

MoleculeAI | React, FastAPI, RDKit
Chemistry search, a molecule editor, chemical properties and interactive 3D structures.

PromMatch | React, FastAPI, PostgreSQL, pgvector
Student matchmaking with weighted questionnaires, semantic profile similarity and mutual matches.

ACS can-drive app
Built tracking and leaderboards in five days for a school campaign that collected 27,000+ cans.

RelayPass | Authorization prototype
Signed agent permissions that narrow on delegation, with inherited revocation enforced in code.

Open Water | React, TypeScript, Three.js
Designed yacht exploration and underwater regions alongside an accessible portfolio reading path.

Technical Skills

Languages: Python, TypeScript, R
Frameworks and libraries: React, FastAPI, Flask, Pandas, Plotly, Three.js, RDKit
Data and tools: PostgreSQL, pgvector, Git, Vercel, browser and device testing
